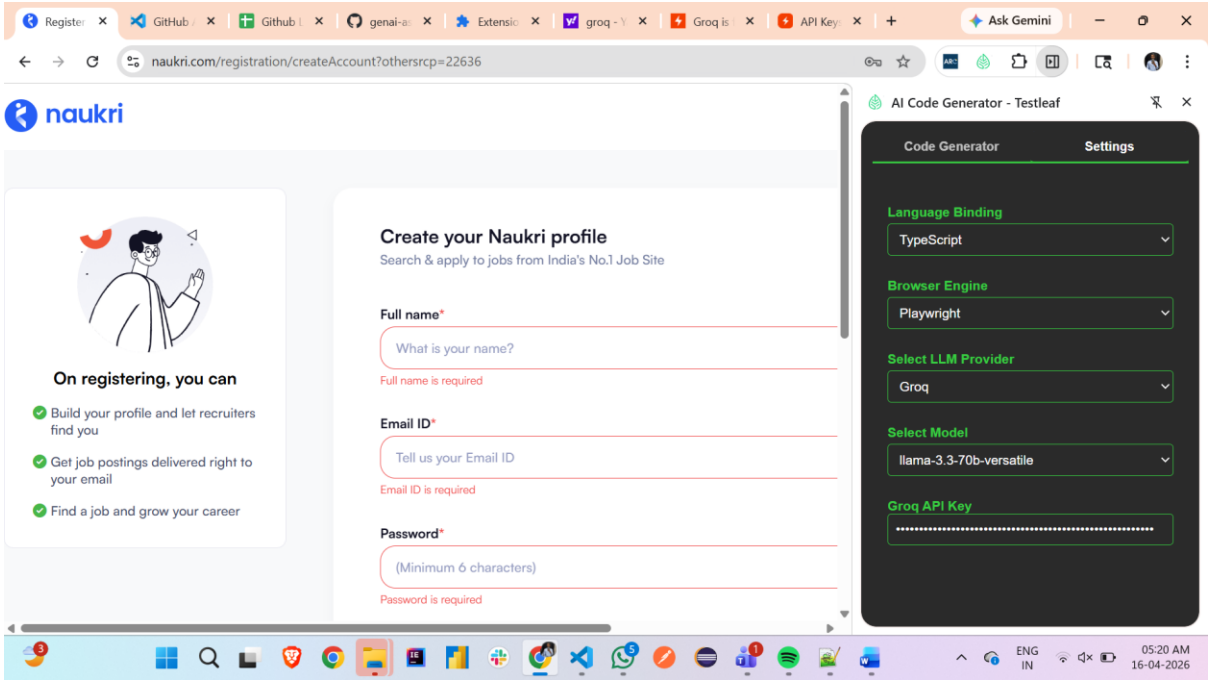
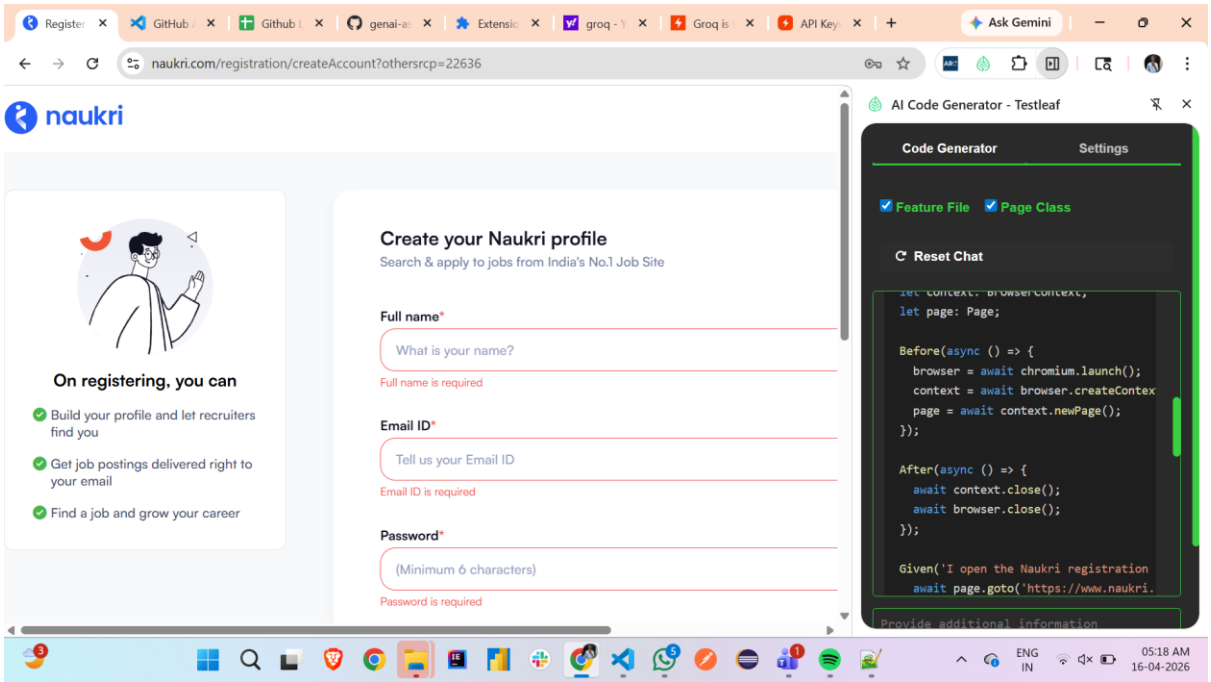
Week 3 Day1 Assignment

Implement Playwright-Typescript with vibe coding.





```
Feature: Create Naukri Profile

  Scenario Outline: Successful profile creation with valid credentials
    Given I open the Naukri registration page
    When I type "<fullName>" into the Full name field
    And I type "<emailId>" into the Email ID field
    And I type "<password>" into the Password field
    And I type "<mobileNumber>" into the Mobile number field
    And I select "<workStatus>" as my work status
    And I click the Register now button
    Then I should be registered successfully

  Examples:
    | fullName      | emailId              | password  | mobileNumber | workStatus |
    | "Rahul Kumar" | "rahul@example.com"   | "password123" | "9876543210" | "exp"      |
    | "Priya Sharma" | "priya@example.com"  | "password123" | "9437543210" | "fresher"  |

import { Given, When, Then, Before, After } from '@cucumber/cucumber';
import { chromium, Browser, BrowserContext, Page } from '@playwright/test';

let browser: Browser;
let context: BrowserContext;
let page: Page;

Before(async () => {
  browser = await chromium.launch();
  context = await browser.createContext();
  page = await context.newPage();
});

After(async () => {
```

```
  await context.close();
  await browser.close();
});

Given('I open the Naukri registration page', async () => {
  await page.goto('https://www.naukri.com/registration/createAccount?othersrcp=22636');
});

When('I type {string} into the Full name field', async (fullName: string) => {
  await page.fill('#name', fullName);
});

When('I type {string} into the Email ID field', async (emailId: string) => {
  await page.fill('#email', emailId);
});

When('I type {string} into the Password field', async (password: string) => {
  await page.fill('#password', password);
});

When('I type {string} into the Mobile number field', async (mobileNumber: string) => {
  await page.fill('#mobile', mobileNumber);
});

When('I select {string} as my work status', async (workStatus: string) => {
  if (workStatus === 'exp') {
    await page.click('.focusable.optionWrap[data-val="exp"]');
  } else if (workStatus === 'fresher') {
    await page.click('.focusable.optionWrap[data-val="fresher"]');
  }
});
```

```
When('I click the Register now button', async () => {
  await page.click('.submitbtn.resman-btn-primary');
});

Then('I should be registered successfully', async () => {
  // Add your registration success logic here
  await page.waitForTimeout(2000); // Wait for 2 seconds
});
```
