Week3 Day2 Assignment

Using Vibe Coding, implement the following:

1. Connect to Jira via API
2. Fetch user stories from Jira to generate test cases

Prompt

Analyze the existing codebase and implement Jira integration.

Proceed step by step, and move to the next stage only after approval is given.

Mandatory approach:
Start with backend implementation first, then continue with the frontend.

Instructions

- **[MANDATORY]** Configure Jira connectivity using email and API key. These credentials must be configurable.
- **[CRITICAL]** Retrieve projects from Jira and automatically populate them in a dropdown.
- **[CRITICAL]** Retrieve user stories for the selected project and populate them in a dropdown.
- Map the **Description** field from the Jira story to the **Description** field in the UI.
- Map the **Acceptance Criteria** from the Jira story to the **Acceptance Criteria** field in the UI.
- If the Jira story does not contain acceptance criteria, populate the UI's acceptance criteria field using the Jira story description.

Story Title *

Employee Profile Employee Self

Description

As a user, I want to employee profile employee self so that the related functionality works as expected.

Acceptance Criteria *

Given the system is operational, when the user performs the intended action, then the system should respond accurately and meet functional expectations.

Additional Info

Any additional information (optional)...

Generate

Generated Test Cases

15 test case(s) generated • Model: meta-llama/llama-4-scout-17b-16e-instruct • Tokens: 1727

Test Case ID	Title	Category	Priority	Expected Result
▸ TC-001	View Employee Profile	Positive	High	Employee profile information is displayed accurately
▸ TC-002	Edit Employee Profile	Positive	High	Employee profile information can be edited successfully
▸ TC-003	Save Changes to Employee Profile	Positive	High	Changes to employee profile information are saved successfully
▸ TC-004	Cancel Changes to Employee Profile	Positive	Medium	Changes to employee profile information are not saved

TC-005	Invalid Input for Employee Profile	Negative	Medium	Error message is displayed for invalid input
TC-006	Empty Fields for Employee Profile	Negative	Medium	Error message is displayed for empty fields
TC-007	Employee Profile with Special Characters	Negative	Low	Error message is displayed for special characters
TC-008	Employee Profile with Long Input	Negative	Low	Error message is displayed for long input
TC-009	Employee Profile with Numbers Only	Negative	Low	Error message is displayed for numbers only
TC-010	Employee Profile with No Changes	Positive	Medium	No changes are saved
TC-011	Employee Profile with Different Case	Edge	Low	Input is saved with correct case
TC-012	Employee Profile with Leading/Trailing Spaces	Negative	Low	Error message is displayed for leading/trailing spaces
TC-013	Employee Profile with Non-English Characters	Negative	Low	Error message is displayed for non-English characters
TC-014	Employee Profile with Null Input	Negative	Low	Error message is displayed for null input
TC-015	Employee Profile with Very Long Text	Negative	Low	Error message is displayed for very long text
